REPORTING PRINCIPLES

AA1000 AP2018 Standard

The standard is based on four fundamental principles:

- Inclusiveness: This principle analyzes whether the company has identified and understood the relevant aspects of its sustainable performance and presents sufficient information in terms of quality and quantity. For more information, please refer to the "Material Issues" section in this chapter.
- Materiality: The information must be the information required by the stakeholders. In other words, it ensures disclosure of all those material aspects whose omission or distortion could influence its stakeholders' decisions or actions. For more information, please refer to the GRI Standards Indicators Table.
- Responsiveness: This report includes the information relating to Ferrovial's response to stakeholder expectations.
- Impact: the company monitors the impact of its activity on its surroundings, not only in economic terms but also from a social and environmental point of view. It also evaluates the return on investment of its social action programs. For more information, see the sections in two minutes, environment and community

GRI STANDARDS GUIDELINES

The GRI Guidelines principles applied are:

Establishing report contents:

- Materiality: Aspects that reflect the significant social, environmental and economic impacts had by the organization or those that could have a substantial influence on stakeholder decisions.
- Stakeholder engagement: Identifying stakeholders and describing in the report how their expectations and interests have been addressed.
- Sustainability context: Presenting the company's performance within the broader context of sustainability.
- Completeness: Coverage should enable stakeholders to assess the performance of the reporting organization

Establishing the quality of the report:

- Balance: The report must reflect both the positive and the negative aspects of the company's performance.
- Comparability: Stakeholders should be able to compare the information over time and with other companies.
- Accuracy: The published information must be accurate and detailed.
- Clarity: The information must be presented in a way that is clear and accessible to everyone.
- $\bullet \ \textbf{Reliability} : The information must be of high quality and it should establish the company's materiality.$
